ANNIKET

Unity Game Developer

anniket19121995@gmail.com | +918003273794 | Lucknow, India

SUMMARY

I am a passionate Unity and VR Developer with over three years of experience in game development and design. I have demonstrated expertise in cutting-edge technologies, such as virtual reality, through my projects. Likewise, I have successfully delivered projects to over 50 international clients and led teams to achieve outstanding results. My commitment to learning and growing in the tech industry drives my innovative approach to game and application development

SKILLS

Unity Engine | VR Development | VR SDKs (Oculus SDK) | Blender 3D | Unreal Engine | Game Optimization | Level Designing | Animations | Data Structures | C# | C/C++ | CSS | JavaScript | Problem-Solving | Client Management | Time Management | Communication

EXPERIENCE

Unity Game Developer/VR Developer 06/2022 –
DanzerArt Studios Present
Freelance as Unity Developer/VR Developer Lucknow, India

- Delivered **50+ Unity and VR applications** across gaming, simulation, training, and visualization for clients in the US, UK, and Germany, generating over **INR 500,000** in freelance revenue.
- Developed **35+ VR experiences for Meta Quest/Quest 2** with advanced interaction systems including **grabbable objects, teleportation, physics-based interactions, VR UI panels, and gesture-driven control logic.**
- Created comprehensive **documentation** detailing project architecture, code modules, VR interaction flows, and testing protocols to ensure smooth handovers and ongoing maintainability.
- Coordinated with a distributed team of **3–5 designers, developers, and 3D artists** to deliver high-quality, client-ready builds on schedule.
- Managed direct client communication across time zones, translating requirements into technical deliverables, providing demo builds, and maintaining an average **4.9/5 client satisfaction rating**.

VR Game Development 2022
Fiverr Lucknow

- I worked as a freelance VR Game Developer on Fiverr, delivering 35+ VR games and immersive applications to international clients.
- I specialized in building interactive experiences using Unity and XR Interaction Toolkit.
- I developed gameplay systems including player interactions, shooting mechanics, UI systems, and physics-based environments. I also optimized projects for Meta Quest devices to ensure smooth performance.
- I collaborated with clients from different countries, understood their requirements, and delivered high-quality, scalable solutions within deadlines.

Graphic Designer 06/2020 –
Whiteboard 05/2023
Graphic Design Company Lucknow, India

- Worked on more than 20 graphic posts
- As Team Lead, I oversaw junior designers on the project..
- Conducted webinars on graphic design.

PROJECTS

SpaceWar VR 07/2025 –
VR Combat Game | Unity | C# | Meta Quest | XR Interaction Toolkit 08/2025

- Developed an immersive **VR space combat game** using Unity and C#, optimized for **Meta Quest**.
- Implemented **VR ship controls**, laser shooting mechanics, enemy AI behavior, and real-time combat feedback.

- Designed **VR interaction systems,** including ray-based targeting, controller input handling, and HUD elements in world space.
- Integrated physics-based movement, collision detection, and projectile systems for realistic space combat.
- Optimized performance to maintain **stable 90+ FPS** using baked lighting, object pooling, and asset optimization.
- Built modular gameplay architecture using **Scriptable Objects and state machines** to support scalability and future levels.

Takeshi's Castle 04/2024 – 05/2024
A game developed based on a popular game format
- Developed a **3D obstacle-based action game** inspired by the Takeshi's Castle format using **Unity and C#**.
- Implemented **player movement systems,** including running, jumping, collision handling, and physics-based interactions.
- Designed and scripted **obstacle mechanics** such as moving platforms, rotating traps, timed hazards, and knockback systems.
- Built modular **level logic systems,** allowing quick iteration and reuse of obstacles across multiple stages.
- Integrated **animation controllers and state machines** for smooth player transitions and responsive controls.
- Optimized gameplay performance by refining physics calculations, collider usage, and scene hierarchy organization.

Solar System Simulation on VR 01/2024 – 02/2024
VR simulation project showcasing the solar system
- Developed an **educational VR simulation** visualizing the solar system using **Unity and C#**, optimized for **Meta Quest**.
- Created **interactive planetary systems** with scalable models, orbital animations, and real-time user interaction.
- Implemented **VR locomotion systems for** smooth movement using the XR Interaction Toolkit.
- Designed **VR UI panels** displaying planetary data such as size, distance, and rotation, using world-space canvases.
- Integrated **physics-based interactions** allow users to grab, rotate, and examine celestial bodies.
- Optimized scene performance through **light baking, LODs, mesh optimization, and draw-call reduction**, maintaining **stable 90+ FPS** on standalone VR hardware.
- Structured simulation logic using **modular C# scripts and ScriptableObjects** for easy expansion and content updates.

Gaming Portfolio 01/2021 – Present
A portfolio showcasing various game development projects
- Showcased 2D,3D and VR game projects
- Included projects made for Fiverr clients

TRAINING / COURSES

AR/VR Development Internship Training
Internshala

HTML, CSS and JavaScript
Udemy
HTML CSS and JavaScript Course at Udemy

EDUCATION

B.Tech (Computer Science and Engineering) 08/2020 – 05/2024
Institute of Engineering and Technology Lucknow, U.P

12th Class 04/2019 – 05/2020
New Angel Public School Pratapgarh, U.P

INTERESTS

Philosophy — I like studying Indian and Western philosophy

Sketching — I enjoy making sketches and creating digital art creation
